The MAXWriter: When You Demand The Very Best In *Handwriting* Machines

In every product lineup, there is a top-of-the-line, platinum-level model that rises above all others, and in the autopen industry, that machine is the MAXWriter. It does everything from signatures to variable data, plus offers the benefits of automatic feed so the MAXWriter can do the work while you take care of other important tasks.

MAXWriter software works with your word processing program and imports personalized or mail-merged documents to create letters, notes, or even address envelopes. Automatic feed capabilities scan page edges for constant placement, or if needed, scan text for variable placement so an attendant is not necessary when the MAXWriter is running. MAXWriter works with any pen you choose, and unlike other machines on the market, there are no additional charges if you exceed a certain number of documents created.

MAXWriter comes with a choice of over 1,000 basic and premium fonts, plus offers the custom option of converting your handwriting into your own font. MAXWriter is the **ONLY** variable output digital autopen made in the USA, so give us a call at 1-800-636-4450 and order your MAXWriter today!
