The Ghostwriter Max: Set It And Forget It

How do you make the nation's best autopen machine even better? The Ghostwriter MAX T Series does just this as it builds on the accomplishments of the workhorse Ghostwriter, and is our current line of automatic feed machines. This line is lightweight and compact, has a 20 by 20-inch footprint, and weighs only 45 pounds while adding the ability to sign large quantities of documents... and walk away..

Great for short-staffed offices, these machines automatically feed and sign documents and other items. The paper catch tray is integrated and retractable for manual operation and storage, while the Ghostwriter Max T uses any writing instrument such as ballpoint, felt-tip, permanent markers, fountain pens, calligraphy pens, pencils...even crayons!

The series features a computerized, dual channel, optical scanner, which enables the machine to locate the correct signing location every time. There is no need to batch documents based on length, as once set up, the machine will adjust its signing position horizontally. This model can also be operated manually for small signing jobs.

The Ghostwriter signature machine is the ONLY digital autopen that is made in the USA, and can be configured for both your functional and budget needs. There's really no need to look anywhere else... so give us a call at 1-800-636-4450 and order your Ghostwriter MAX T today!
