## The T-Writer: The Next Generation In *Handwriting* Machines

It is an obvious question: Are there Automated Signature Technology products that can address envelopes or write a letter? The answer: "Of course!" The T-Writer is an advanced version of the Ghostwriter T Series specifically for customers who want to use variable data to personalize documents.

**T**-Writer software works with your word processing program and imports your personalized or mail-merged documents to create letters, notes, or even address envelopes. The T-Writer works with any pen you choose, allowing you to create a unique custom look to all your materials, and unlike other machines on the market, there are no additional charges if you exceed a certain number of documents created.

**T**he T-Writer comes with a choice of over 1,000 basic and premium fonts, but should you want something even more unique, we are able to convert your handwriting into your own font to be used within the system.

**T**he T-Writer is the **ONLY** variable output digital autopen made in the USA, and can be configured specifically to your needs. There's really no need to look anywhere else...so give us a call at 1-800-636-4450 and order your T-Writer today!
